

SO EASY PLEASEY MAC & CHEESEY!

How to Bake & Enjoy Your Creamy Mac & Cheese

Allow Mac & Cheese to sit out at room temperature for a good hour before baking to take the chill off. Bake covered at 350°F for approximately 30 minutes. Remove from oven. Lift lid carefully and stir gently. *Repeat again for another 20-30 minutes.* Check how it's doing by sneaking a bite. Bake *uncovered* another 15-30 minutes or so until center temperature reaches 160°F. Total baking time is about 1 to 1-1/2 hours. Baking time will vary depending on the size of Mac & Cheese you ordered, as well as other items in your oven. To expedite baking time on the larger size, divide the Mac & Cheese into two pans. Serve immediately after baking for maximum creaminess dreaminess!
